CHINESE ASTRONOMY AND ASTROPHYSICS
VOL. 13 (1989)

SUBJECT INDEX

Relativistic Astrophysics
Pressure collimation of relativistic jets / *LU Ju-fu & YANG Zhong-guo* 291

Wobble radiation from pulsars / *BAO Gang, ZHOU Bingju & Zhang Zhenjiu* 345

Theoretical Cosmology
Quantum cosmology with spinor field / *SHEN Yougen & ZHOU Zhihong* 158

Observational Cosmology
Clustering of quasars: an analysis of a sample of quasar candidates in SA94 / *HUANG Ke-liang, LI Chang-qing & YAO Yong-qiang* 82

A model for the formation of large-scale voids and filaments / *CHEN Xingming & SONG Guoxuan* 132

Objective prism survey of QSO candidates of field centered at 00^h00^m, $+00°00'$. III. The northwestern quarter. / *ZHAN Yin & CHEN Jiansheng* 139

A re-examination of the correlation between the Lyman-alpha absorption line intensity and the emission redshift in QSOs / *BIAN Yu-lin, ZOU Zheng-long & CHEN Jian-sheng* 241

The 3000A bump in quasars and Seyfert galaxies / *YAN Ming, CHENG Fu-hua & YOU Jun-han* 268

Objective prism survey of QSO candidates in UK Schmidt Sky Survey Area 823. IV. The southwestern quarter / *ZHAN Yin & CHEN Jian-sheng* 321

The relation between Cerenkov redshift of H-I lines of quasars and the intensity ratio Lyman-alpha/CIV / *YAN Ming, YOU Jun-han & CHENG Fu-hua* 360

VLBI observation of 3C 147 at 1.662 GHz / *ZHANG Fu-jun, R. L. Mutel, SU Bu-mei, ZHU Han-shu, WANG Qiang & R. T. Schilizzi* 386

The emission and forbidden lines in quasars / *LIU Yang & HE Xiangtao* 417

Gamma-Ray Astrophysics
High energy gamma rays from Cygnus X-3 / *LI Tipei & WU Mei* 383

Clusters of Galaxies
Studies on the Coma cluster. I. Determination and discussion of membership / *ZHAO Jun-liang, PAN Rong-shi, HUANG Song-nian & HE Yan-ping* 224

The 3000A bump in quasars and Seyfert galaxies / *YAN Ming, CHENG Fu-hua & YOU Jun-han* 268

Objective prism survey of QSO candidates in UK Schmidt Sky Survey Area 823. IV. The southwestern quarter / *ZHAN Yin & CHEN Jian-sheng* 321

The relation between Cerenkov redshift of H-I lines of quasars and the intensity ratio Lyman-alpha/CIV / *YAN Ming, YOU Jun-han & CHENG Fu-hua* 360

VLBI observation of 3C 147 at 1.662 GHz / *ZHANG Fu-jun, R. L. Mutel, SU Bu-mei, ZHU Han-shu, WANG Qiang & R. T. Schilizzi* 386

The emission and forbidden lines in quasars / *LIU Yang & HE Xiangtao* 417

Gamma-Ray Astrophysics
High energy gamma rays from Cygnus X-3 / *LI Tipei & WU Mei* 383

Clusters of Galaxies
Studies on the Coma cluster. I. Determination and discussion of membership / *ZHAO Jun-liang, PAN Rong-shi, HUANG Song-nian & HE Yan-ping* 224

Galactic Dynamics

A uniformly valid asymptotic density-potential relation for spiral galaxies / *YUE Zeng-yuan* 250

Different responses to intruder between spirals with live and rigid haloes / *HUANG Song-nian* 442

Molecular Clouds and Infrared Sources

Observation of an IRAS source in a dark cloud in Taurus / *LIU Cai-pin, KIMURA H., YAN Jun & YANG Ji* 260

VLBI measurement of OH masers in NGC 6334 F / *ZHENG Xing-wu* 336

A study of the ultra-compact H-II region NGC7538-IRS1 / *ZHOU Zhenpu & Nguyen-Q-Rieu* 375

Stellar Evolution

Evolution of interstellar clouds towards star formation. I. The density-mass diagram of polytropic models / *KIMURA H. & LIU Caipin* 35

Decoupling treatment of linear non-adiabatic non-radial pulsations of stars / *LI Yan* 424

Supernovae. Neutron Stars. Pulsars

The effect of radiation energy loss on shock wave propagation / *FAN Zuhui & YU Yunqiang* 232

Period variation of X-ray pulsars and Kelvin-Helmholtz instability at the accretion disk boundary / *ZHANG Bo & GE Yunzao* 366

Is the 35-day cycle of Her X-1 caused by the free precession of the neutron star? (abstract) / *QIAO Guojun & PENG Yuan* 463

Star Characteristics

Maser emission of SiO isotopes from stars and the pumping mechanism / *ZHOU Zhen-pu & KAIFU N.* 46

Binary Stars

Photoelectric photometry of the nova-like eclipsing variable PG1030+590 / *ZHANG Erhe* 2

Differential correction for spot parameters in the RS CVn system RT Coronae Borealis / *ZHAI Disheng & CHEN Hailing* 9

New photoelectric measurements of the Delta Scuti variable Theta-2 Tauri / *HUANG Lin, GUO Zihe & JIANG Shiyang* 52

Outside eclipse H-alpha spectra of five eclipsing binaries / *CHA Guang-wei, TAN Hui-song, LI Xiao-yu & PENG Song-quan* 61

Analysis of the variations in the light curve of U Pegasi and starspot activity / *ZHAI Di-sheng & ZHANG Xiao-yu* 97

Three long-period contact or semi-detached systems / *LI Zong-yun, LEUNG Kam-ching & DING Yue-rong* 181

HD94033 and the mass of SX Phoenicis type variables / *JIANG Shi-yang* 213

Photoelectric photometry of the short-period binary AX Draconis / *ZHAI Di-sheng, LI Qi-sheng & XIE Xing-fa* 216

Four-color ubvy photometry and starspot parameters of WY Cancri / *XIE Xing-fa, ZHAI Di-sheng, CHEN Hai-lin & LI Yan* 281

A0535+26 and the structure of the outflowing gas from Be stars / *MI Guo-zhe & SHEN Jin-ying* 300

Radial velocity observations and physical activities of the contact binary system SW Lacertae / *ZHAI Disheng & LU Wenxian* 350

Solar Observations

Observations of the magnetic and velocity fields of two solar flares / *LI Jing, AI Guoxiang, ZHANG Hongqi, LI Wei & CAO Ai* 26

The material motion in postflare loops / *TANG Yu-hua & XU Ao-ao* 173

The quasi-periodic oscillation of spike radiation in solar radio burst / *JIN Sheng-shen & LI Xiao-cong* 313

The velocity field and X-ray spectrum of the flare of 1981 May 13 / *LI Ru-fen & ZHANG Qin* 454

Solar Physics. Magnetohydrodynamics

Acceleration mechanism of periodic tearing mode and time scale of radio spikes / *HUANG* Guangli 18

The power spectrum of Alfvénic fluctuations propagating in nonisotropic solar wind / *TU Chuan-yi (C. Y. Tu)* 105

Shearing dynamics of magnetic arches and formation of prominences / *SONG Mutao* 143

Contribution of plasma turbulence field to the stark broadening function / *ZHANG Zhenda, LIN Jun & WANG Zhenyi* 165

Relaxation of ions during the impulsive phase of solar flares / *CHEN Gui-fu & HUANG Yong-nian* 394

A theoretical study of the direction and polarization of the solar radio millisecond spike radiation /*SHI Jian-kui & ZHAO Ren-yang* 400

Equilibrium and non-equilibrium of two-arch structures in the solar atmosphere / *SUN Kai & LIU Bu-lin* 432

The Heliosphere

Two examples of strong magnetic clouds interacting with the corotating stream / *ZHANG Gong-liang* 119

Comets

A determination of the aberration angle of the plasma tail of Comet Halley / *HU* Zhongwei *& ZHAO Jianhoug* 166

Coma spectra of Comet Halley / *XIE Guang-zhong, CHA* Guang-wei , *LI Xiao-yu, HAO Peng-jiu, BAO Meng-xian & ZHANG Yun* 296

Theoretical analysis of brightness profiles of the plasma tail of Comet Halley / *HU Zhong-wei & YAN Lin-shan* 330

Asteroids
CCD observations of Icarus (1566) / *ZHANG Jia-xiang, YANG Ji-xing & WU Yue-zhen* 69

Celestial Mechanics and Artificial Satellites
Deformations of elastic Earth and station displacements / *XIA Yi-fei, XIAO Nai-yuan & DING Yue-rong* 88

Processing satellite laser ranging in a general relativistic framework / *ZHU Sheng-yuan, PAN Rong-shi, YAN Hao-jian, CHENG Zong-yi, ZHU Wen-yao, HUANG Cheng & YAO Min* 73

Relativistic effects of rotating and oblate Earth on artificial satellite orbits / *CHENG Zong-yi, YAN Hao-jian & ZHU Wen-yao* 188

Application of Lie transformation in area-preserving mapping / *LIU Xiang-jun, SUN Yi-sui & LIU Lin* 272

The space distribution and orbital resonances of asteroids / *LIU Lin & LIAO Xin-hao* 408

Fundamental Astronomy
All-stars adjustment method for the reduction of meridian and astrolabe catalogues / *FAN Yu, DU Min-hui, MAO Wei, ZHOU Yu-di & ZHANG Yao* 197

Analysis of Yunnan Observatory photoelectric astrolabe data / *HU Hui, CAI Xing & WANG Rui* 207

A determination of the errors in the 1980 IAU principal nutation constants / *LI Zheng-xin* 307

Reduction Methods
Processing of censored data and the study of luminosities of active galactic nuclei / *CAO Li-hong & LIU Ru-liang* 55
